## SUNGEN opens warehouse in Southern California

SUNGEN International Limited ("SUNGEN" or the "Company"), a manufacturer of new generation solar photovoltaic modules dashing to grid parity, has announced the establishment of warehouse operations in sun-soaked Southern California.

The warehouse hub is located in Carson, CA, adjacent to the Port of Long Beach, one of the busiest ports in the United States. First service began earlier this month in a visible sign of SUNGEN's North American expansion and ongoing commitment to serve its growing market segment in the U.S.

"We are pleased to announce the commencement of operations at our Southern California warehouse. We are stepping up to serve the needs of our downstream business partners and remain dedicated to being the most accessible PV manufacturer in the marketplace," said Marco Lopez, SUNGEN's North American Director of Sales & Marketing.

### About SUNGEN International Limited

SUNGEN International Limited is a manufacturer of high performance crystalline and thin film PV modules developed from its in-house process technologies and equipment. From remote to urban developments, SUNGEN has provided countries on five continents with high performing solar products providing dependable and sustainable electric power for a more livable, breathable environment.
